(54) Title: **TEMPERATURE CHANGE POUCH WITH DISPENSING CHAMBER**

(57) Abstract: A product dispensing pouch formed from flexible film having at least a first compartment (320), a second compartment (322). Additionally, the pouch includes a third compartment (318) containing a product. A first component contained in the first compartment (320), a second component contained in the second compartment (322), and at least one of the first and second components being flowable. In addition, the pouch has a first frangible seal (324) located between the first compartment (320) and the second compartment (322). The pouch is adapted to provide a temperature modifying reaction/event via the application of pressure to one or both of the first and/or second compartments (320, 322) to rupture the frangible seal (324), and the pouch is adapted to dispense the product from the third compartment (318).
